

Switches

PPS-TH91

Solid state high voltage, high current switch for pulsed power applications

General Applications:

- Environmental systems (De-NOx/SOx electrofilters)
- Thyratron replacement
- Material desintegration
- Food sterilization
- Magnetic forming
- Medical systems
- Security systems
- Beam accelerators
- Seismic research

Example of a 20kV, 13kA 300Hz, 10kA/ μ s Switch Assembly

Features :

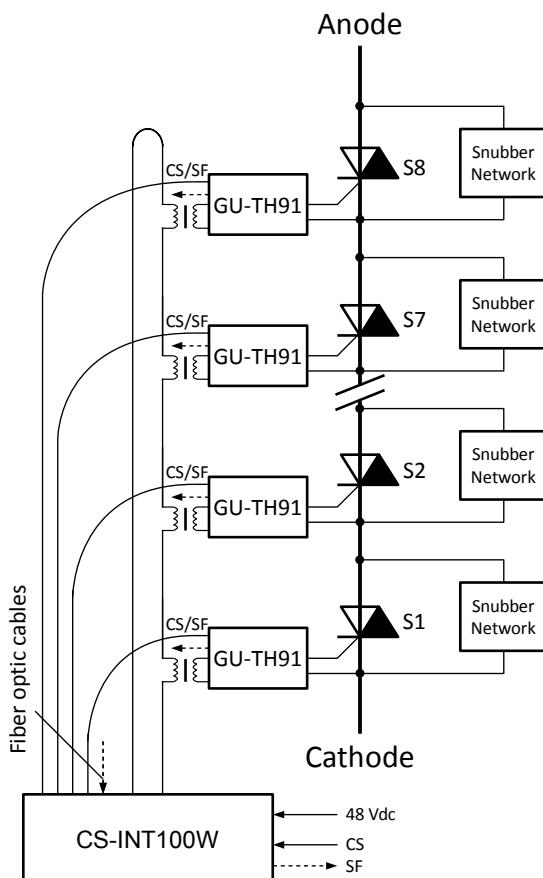

- DC charge voltage up to 30kV
- Pulse current up to 50kA
- High pulse repetition rate
- Current rise rate up to 30kA/ μ s
- Reverse conducting with monolithic integrated free wheel diode
- Reverse blocking version available on request
- Immune to vibration compared to thyratron
- Any mounting position possible comparing to thyratron
- Convection, forced air or liquid cooling
- Liquid cooling for high rep. rate applications
- Convection, forced air cooling on request
- Ready to use with integrated power supply, monitor and driving system

Technical specification of 20kV switch AA-10375-008

Parameter	Symbol	Remarks	Min.	Typ.	Max.	Unit
Operating voltage	V	Working voltage for 100 FIT (Element)	-	-	25	kVDC
Pulse current	I	Single pulse (10μs)	-	-	50	kA
Current rise rate	di/dt		-	-	30	kA/μs
Leakage current	I _{leak}		-	-	10	mA
Number of levels	n		-	8	-	pcs
Cooling system	-	water cooled			50	l/min.
Operating temperature			5	-	60	°C
Storage temperature			-25	-	85	°C
Logic power supply	V _{Logic}		48	48	72	VDC
